Experience

IT Administrator / Programmer at D.W. Story and Associates

April 2016 - Present (1 year)

I was brought in to migrate them from a ASP.NET application in which they had lost the source code to -- to a robust web platform that would give them control back over their data.

Over a few months, I was able to wrap around their existing database (2000SQL Server) and bring them into the web based application era.

Current Clients in which use these applications in everyday functions are Geico, Penkse, and many more auto insurance companies.

Programmer at The Body of Christ

October 2015 - Present (1 year 6 months)

After leaving my CTO position with Avisolve, with a heart change, I decided to start building a web application that would eventually be able to give back to local communities. Three Different main functions:

<https://www.thebodyofchrist.us/>

- 1.) Bringing awareness to local needs in your community, and connecting end users to those needs.
- 2.) Enabling a state of the art indexing system that could crawl the internet for sermons and teachings and then automatically transcribe these sermons/teachings for advanced analytics and search capabilities.
- 3.) Creating online community groups where people can plan and organize daily bible study content and collaborate on scriptures.

CTO / Co-Owner at Avisolve

October 2014 - September 2015 (1 year)

As a global company, based out of Phoenix, Avisolve is a group of Talented IT Specialist and Experts who desire to share our Passion of Technology with the world. Avisolve recognizes the value of Technology and Innovation; by utilizing their extensive strategic partner base, are capable of not only providing competitive pricing on over a million products -- but also in their architects creating the most efficient solutions based off your needs.

Projects and Responsibilities

- Defining Technology Roadmaps and Growing Partner/Vendor Relationships
- Website Design, Graphic Design, Web Application Development, and marketing.
- Product Development
